## SolidWorks View Manipulation and System Tips

### Objective

Know how to:

1. Manipulate the model view (mouse, mouse+keyboard, hotkeys)
2. Use design tree and rollback bar
3. Find help material
4. Change Units
5. Change add-ins that load on start-up
6. Take custom screen shots

## View Manipulation

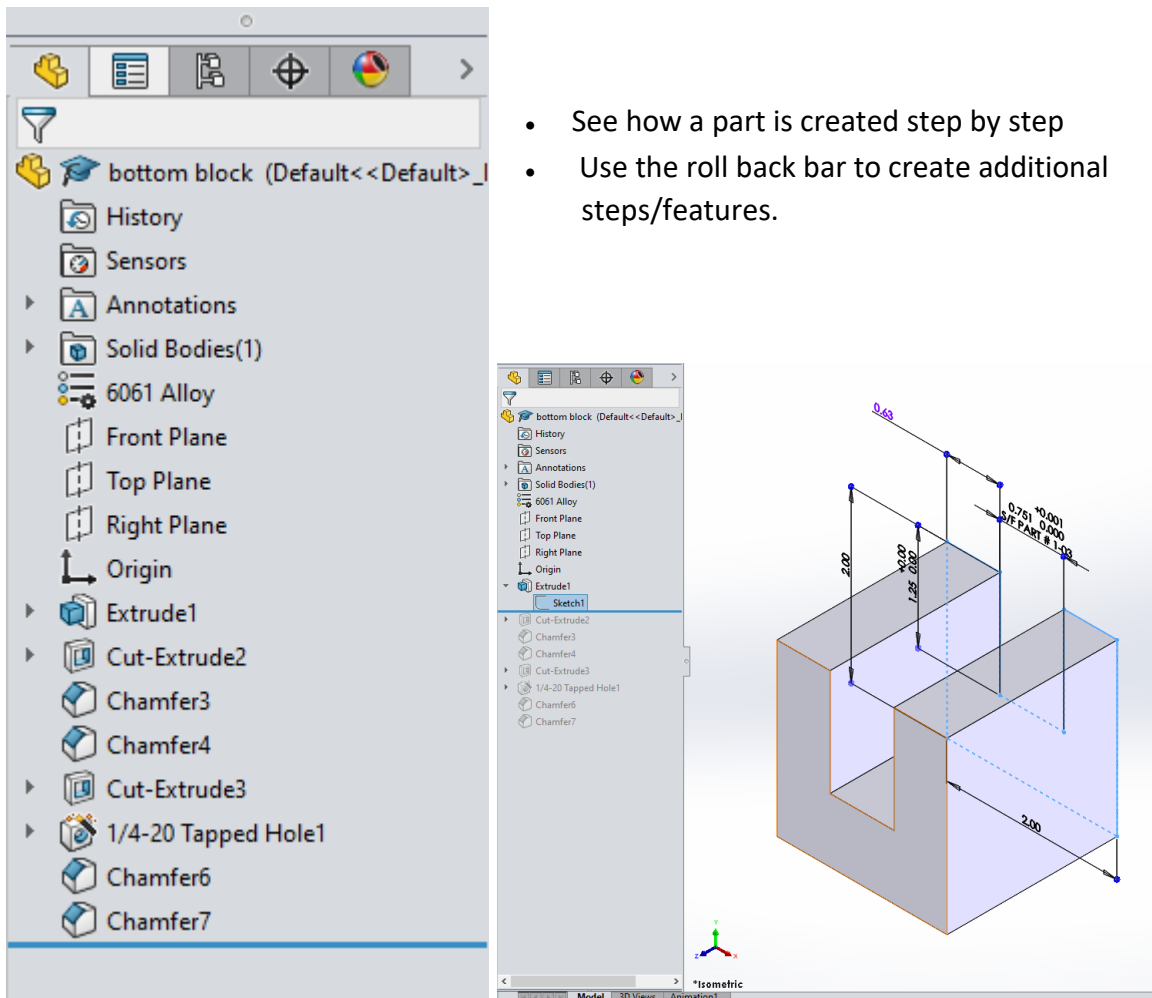

- Holding middle scroll button allows user to rotate part
- Scrolling in and out with the middle scroll wheel allows the user to zoom
- Holding the center scroll wheel and the right button allows the user to choose additional part manipulators such as pan, zoom fit, etc.

## View Hot Keys

## Demo – SolidWorks Introduction

 Front	Ctrl+1
 Back	Ctrl+2
 Left	Ctrl+3
 Right	Ctrl+4
 Top	Ctrl+5
 Bottom	Ctrl+6
 Isometric	Ctrl+7
 Normal To	Ctrl+8

## Design Tree

The image shows a screenshot of the SolidWorks software interface. On the left is the Design Tree, which lists the model's structure: bottom block (Default <<Default>), History, Sensors, Annotations, Solid Bodies(1), 6061 Alloy, Front Plane, Top Plane, Right Plane, Origin, Extrude1, Cut-Extrude2, Chamfer3, Chamfer4, Cut-Extrude3, 1/4-20 Tapped Hole1, Chamfer6, and Chamfer7. On the right is a 3D isometric view of a rectangular block with a cutout. Dimensions are shown: a total width of 2.00, a cutout width of 0.63, a cutout depth of 1.25, a cutout height of 1.00, and a chamfered edge with a radius of 0.0001. The status bar at the bottom indicates the current view is Isometric.

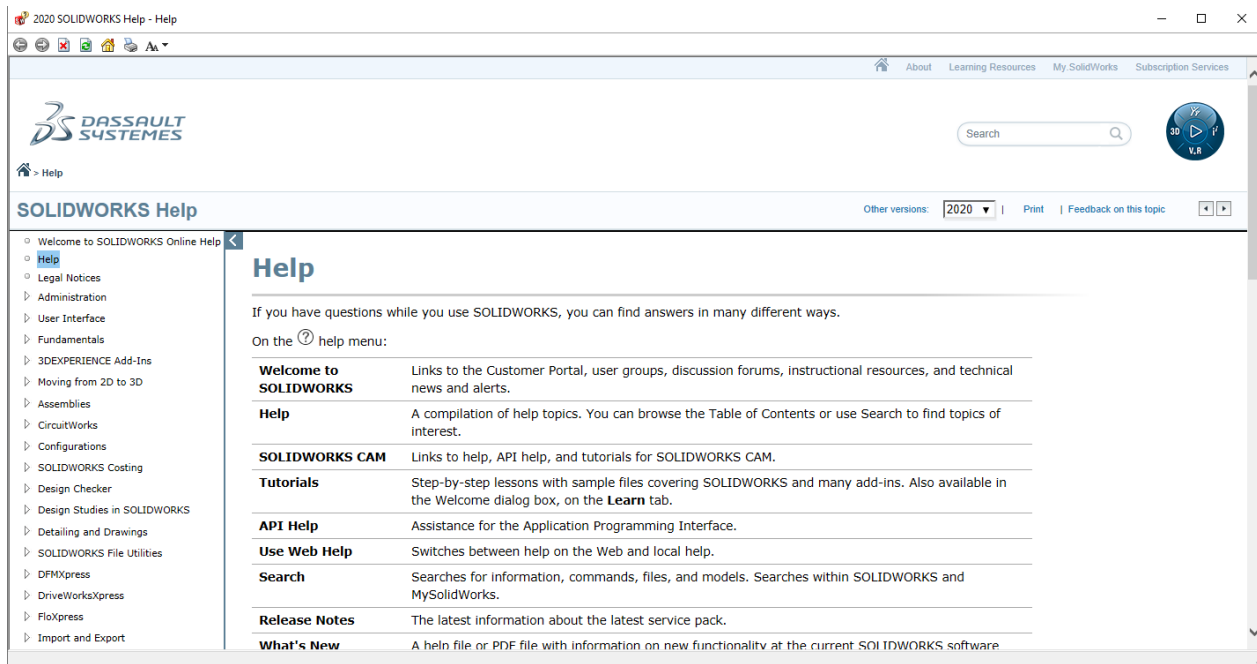

- See how a part is created step by step
- Use the roll back bar to create additional steps/features.

## System Options

- Change system properties in **Tools** → **Options**
- Change the user interface under System Options (this stays the same if changed after SW closes)
- Under Document Properties change units, and document appearance (this only applies to the open document).
- All online tutorials are in metric, all projects are in English.

## Add-Ins

**Recommendation:** To speed up SolidWorks loading time, uncheck Simulation and CAM from the Start Up column.

## Screen shots for HW

**Recommendation:** Use the Sketch and Snip Tool on Windows computers (Shift+Window+S) – Choose from Rectangle, Freeform, Window, Full-Screen
