

EXPO Homework Assignment (10 points)

Attend the In-Person Engineering EXPO on Friday, April 26th between 9am and 2 pm. The EXPO is located in the ICCU Arena. <https://www.uidaho.edu/engr/events/expo>

While there talk to three different capstone teams and write down their responses to the following questions. **Type the responses** up and submit them for your homework assignment.

Team #1

- a) Name of person you talked to (and their major)
- b) Project Title
- c) Did they have any unexpected problems during their project, and if so what were the problem(s) and how did they resolve them?
- d) What sage advice or hard-earned wisdom would they give to future capstone students?

Team #2

- a) Name of person you talked to (and their major)
- b) Project Title
- c) Did they have any unexpected problems during their project, and if so what were the problem(s) and how did they resolve them?
- d) What sage advice or hard-earned wisdom would they give to future capstone students?

Team #3

- a) Name of person you talked to (and their major)
- b) Project Title
- c) Did they have any unexpected problems during their project, and if so what were the problem(s) and how did they resolve them?
- d) What sage advice or hard-earned wisdom would they give to future capstone students?

You can talk to more than three teams, and you can certainly ask more than just these four questions. But for this assignment you just need to write up at least each of their responses to these questions.
