

*"The world hates change,
yet that is the only thing
that has brought progress."*

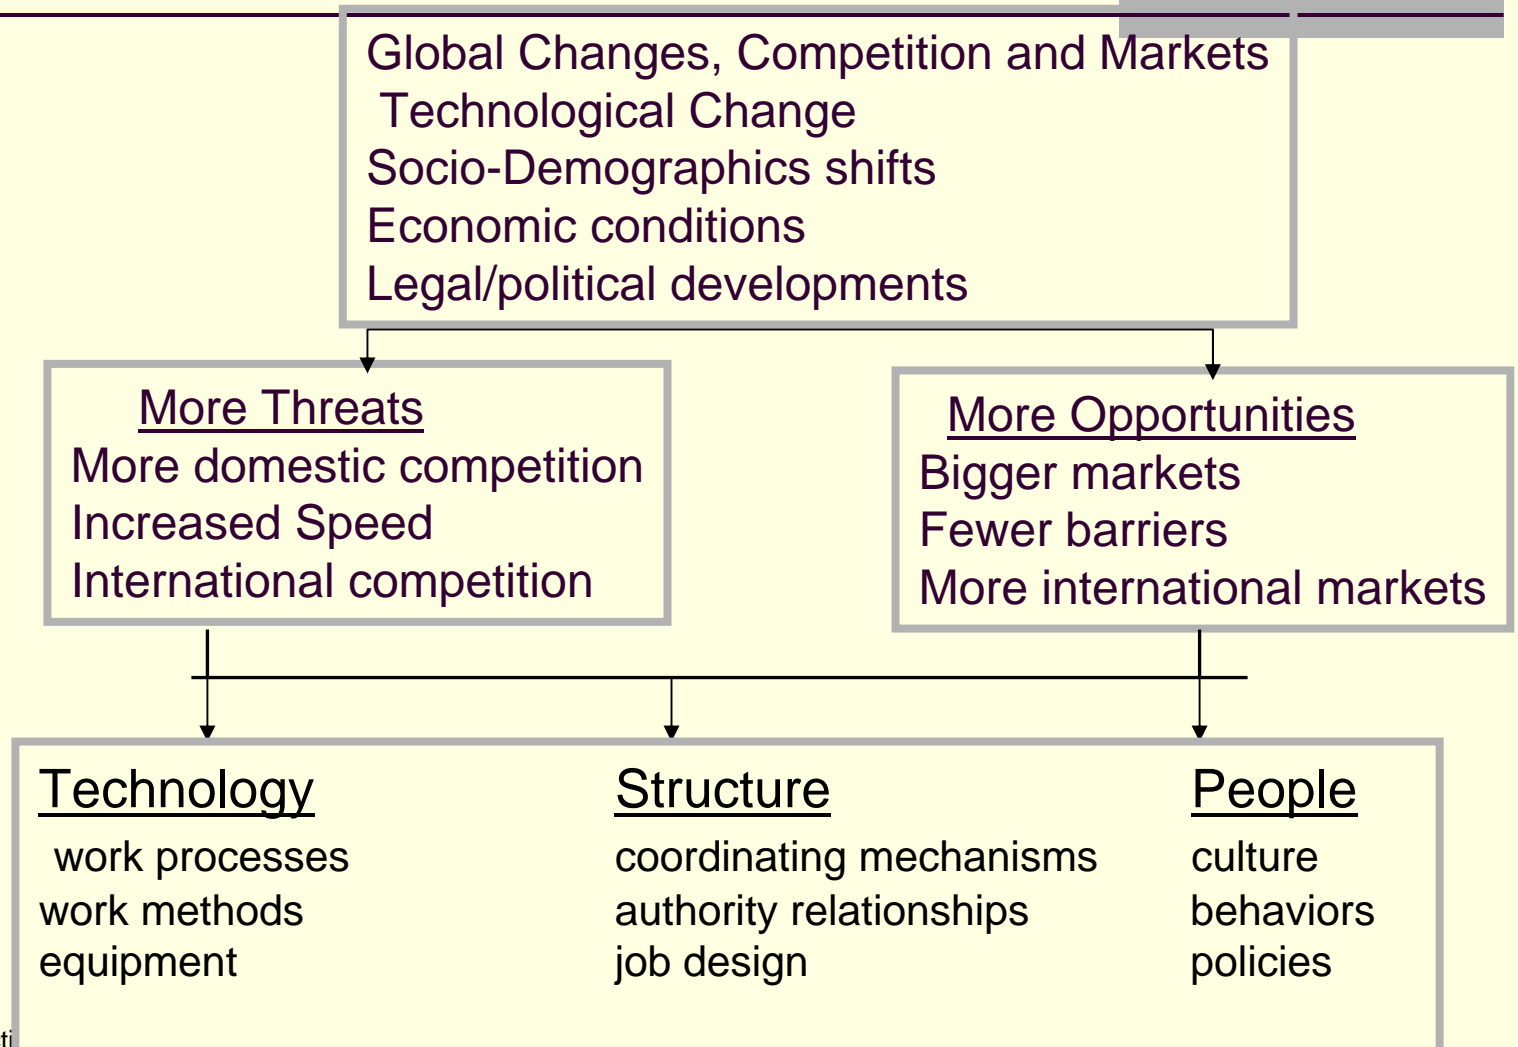

– Charles Kettering
Charles F. Kettering Foundation

Organizational Change

External Forces Driving the Need for Major Organizational Change

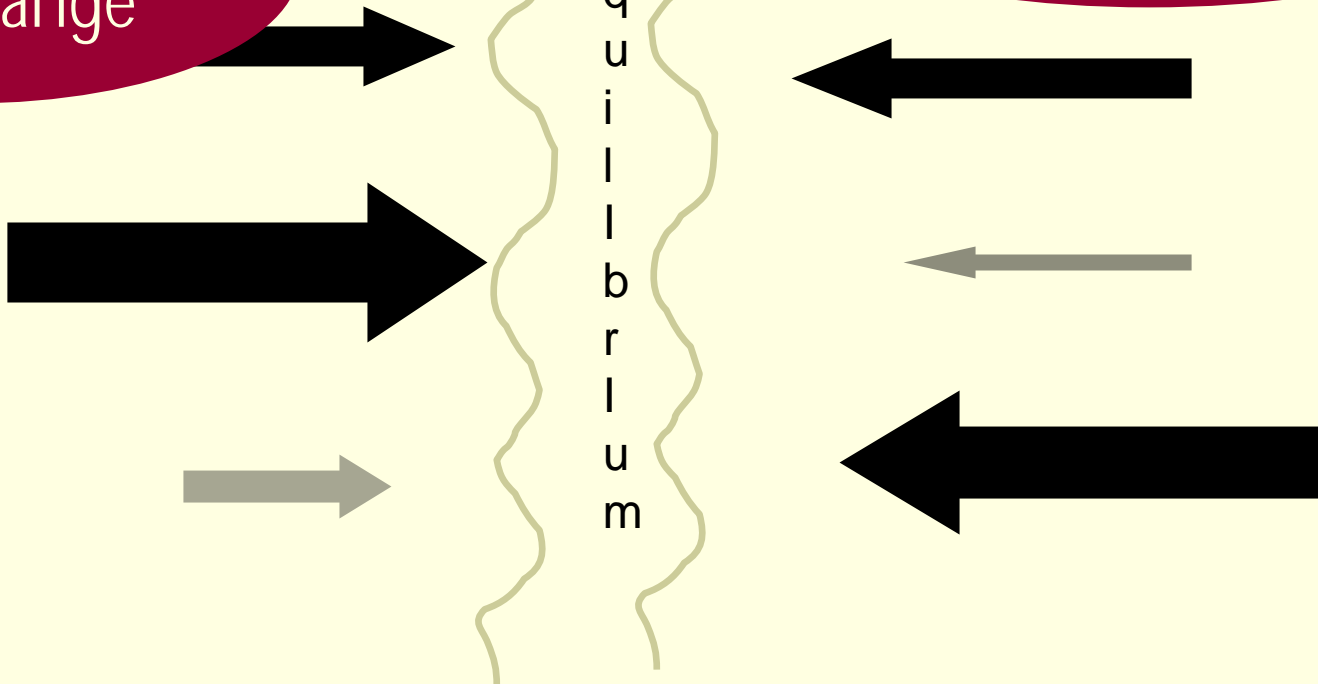

Force-Field Model of Change

Driving Forces
For Change

Restraining Forces
Against Change

Forces FOR change

External forces

- Marketplace competition
- Government laws and regulations
- New technologies
- Labor market shifts
- Cycles in the economy
- Social change

Internal forces

- Strategy modifications
- New equipment
- New processes
- Workforce composition
- Restructured jobs
- Compensation and benefits
- Labor surpluses and shortages
- Employee attitudes

Forces AGAINST change

- Internal forces
- fixed assets not easily transferable
- limited information on internal processes
- trapped by own history
- internal/political constraints
- External forces
- legal/fiscal barriers to entry/exit
- availability of external information

INDIVIDUAL RESISTANCE

Why do people resist change?

- Inertia
- Self-interest/fear
- Misunderstanding
- Different assessments
- Management tactics/mistrust

Koch and French:
Resistance to Change
article

Change Happens In Stages

UNFREEZING

(breaking from the old way of doing things)

MOVING

(implementing the change)

REFREEZING

(reinforcing and supporting the new ways)

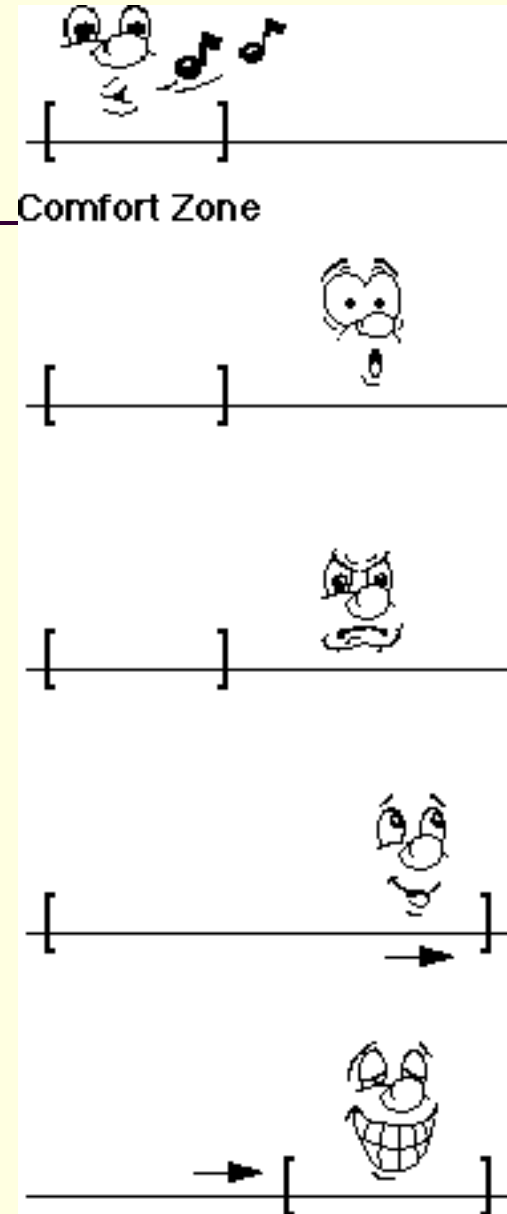

- Stability

- Encounter change

- Learn about situation

- Problem solve / adapt

- Reframe comfort zone

UNFREEZING

(breaking from the old way of doing things)

Methods for Reducing Resistance to Change

Approach

Commonly Used

Advantages

Disadvantages

Education & Communication

Where there is a lack of information or inaccurate information & analysis

Once persuaded, people will often help with the implementation of the change

Can be very time consuming if lots of people are involved

Participation & Involvement

Where the initiators do not have all the information they need, and where others have considerable power

People who participate will be committed to implementing change, and any relevant information they have will be integrated into the plan

Can be very time consuming if participators design an inappropriate change

Facilitation & Support

Where people are resisting because of adjustment problems

No other approach works as well with adjustment problems

Can be time consuming and expensive, and still fail

UNFREEZING

(breaking from the old way of doing things)

Methods for Reducing Resistance to Change

Approach

Negotiation & Agreement

Manipulation & Cooptation

Explicit & Implicit Coercion

Commonly Used

Where someone or some group will clearly lose out in a change, and where that group has considerable power to resist

Where other tactics will not work, or are too expensive, particularly when the resisting group is powerful

Where speed is essential and the change initiators possess considerable power

Advantages

Sometimes it is a relatively easy way to avoid major resistance

It can be a relatively quick and inexpensive solution to resistance problems

It is speedy and can overcome any kind of resistance

Disadvantages

Can be too expensive in many cases if it alerts other to negotiate for compliance

Can lead to future problems if people feel manipulated

Can be risky if it leaves people angry at the initiators

MOVING

(implementing the change)

Implementing Planned Changes

- Organization development (OD)
 - An activity (*intervention*) designed to facilitate planned, long-term organization-wide change
 - Focuses on the attitudes and values of organizational members;
 - Is essentially an effort to change an organization's culture.

Process Consultation
Survey Feedback
Team Building
Intergroup Development

Structural Variables Affecting Innovation

- Organic structures
 - Positively influence innovation through less work specialization, fewer rules and decentralization
- Easy availability of plentiful resources
 - Allow management to purchase innovations, bear the cost of instituting innovations, and absorb failures.
- Frequent interunit communication
 - Helps to break down barriers to innovation by facilitating interaction across departmental lines.

Characteristics of an Innovative Culture

- Acceptance of ambiguity
- Tolerance of the impractical
- Low external controls
- Tolerance of risk
- Tolerance of conflict
- Focus on ends rather than on means
- Open systems focus

Symptoms Of Stress

■ Psychological symptoms

- Increased tension
- Anxiety
- Boredom
- Procrastination

■ Behavior-related symptoms

- Changes in eating habits
- Increased smoking
- Substance consumption
- Rapid speech
- Sleep disorders

Reducing Stress

- **Person-job fit concerns**
 - Match employees to their jobs, clarify expectations, redesign jobs, and increase employee involvement and participation
- **Employee assistance programs (EAPs)**
 - Programs that help employees overcome personal and health-related problems
- **Wellness programs**
 - Programs that help employees prevent health problems
