

Site Constraints

- Significant Slope
- Lack of flat land
- Extensive excavation needed

Site Response

- Consolidation of uses and program
- Utilizing existing access ways
- Pushing building towards street, minimizing excavation

- Stormwater Runoff
- Natural Ventilation
- Natural Lighting
- Taking Advantage of excess heat from adjacent building for heating needs
- Photovoltaics
- Solar Orientation
- Maximizing views to the North
- Keeping with the natural topography and vegetation
- Thermal use and zoning
- Relating to architectural context
- Social sustainability
