Electrical and Computer Engineering

1. Change the curricular requirements of Computer Engineering (B.S.Comp.E.) [Effective: Summer 2014]

Any student majoring in computer engineering may accumulate no more than five (5) letter grades of D’s and F’s in lower-division mathematics, science, or engineering courses that are used to satisfy graduation requirements. Included in this number are multiple repeats of a single class or single repeats in multiple classes and courses transferred from other institutions. Specifically excluded are D or F grades from laboratory sections associated with courses.

Rationale: The proposed change was approved by the ECE curriculum committee and the ECE faculty last year. However, an incorrect version of the wording was forwarded on to the college and university level committees and became part of the 2013-2014 catalog. This change is to correct that wording to be in line with the original intent of the faculty.

2. Change the curricular requirements of Electrical Engineering (B.S.E.E.) [Effective: Summer 2014]
