Agricultural Economics and Rural Sociology

1. Change the following course:

   AgEc 525  Master's Econometrics (3 cr)
   
   Same as Stat 525. Sampling techniques, Multivariate linear regression and analysis of variance with economic applications. Cooperative: open to WSU degree-seeking students.
   
   Prereq: 3 cr in statistics Stat 431 or equivalent; or Permission of Instructor

Rationale: Dropping the general prerequisite of “3 credits of statistics” and adding the specific prerequisite of Stats 431 better prepares the student wanting to take AGEC 525. In addition, the specific course was added in response to review by the Statistics Department regarding the potential to cross list STAT 525 and AGEC 525. The resulting cross-listed course then can be used as a statistics course counting toward a Certificate in Statistical Science; this would allow students to be more competitive in the job market.
