COLLEGE OF SCIENCE
Proposed Catalog Changes

Effective Term (unless otherwise noted) = Summer 2015

Geological Science

1. Change the following course:

**Geol 423  Principles of Geochemistry (3 cr)**
Physiochemical principles applied to geologic processes. Topics covered include atmospheric geochemistry, environmental geochemistry, aqueous geochemistry, crystal chemistry, radiogenic and stable isotopes. Two lec and one 2-hr lab a wk.

**Prereq:** Geol 101/101L or Geol 111/111L, and Chem 112, Geol 249 and Math 143 with a grade of "C" or better

Rationale: Chem 112 was dropped from the BS Geology degree requirement but was our over site of dropping it as a pre-req from Geol 423. The appropriate prerequisite is Mineralogy, Geol 249, which itself has a Chem 111 prerequisite.
