COLLEGE OF AGRICULTURAL AND LIFE SCIENCES
Proposed Catalog Changes

Effective Term (unless otherwise noted) = Summer 2015

Plant, Soil, and Entomological Sciences

1. Change the following course:

   **Soil 205  The Soil Ecosystem (3 cr)**
   Introduction to the physical, chemical, and biological nature of soils.
   **Prereq:** Chem 101 or satisfy Prereq for Chem 111 or Instructor Permission

   **Rationale:** Chemistry 101 is no longer a prerequisite for Chemistry 111. Students may register for Chemistry 111 without having first completed a chemistry course. Consequently, students may now register for SOIL 205 with no chemistry background.
