Distance Education Availability

To comply with the requirements of the Idaho State Board of Education (SBOE) and the Northwest Commission on Colleges and Universities (NWCCU) the University of Idaho must declare whether 50% or more of the curricular requirements of a program which may be completed via distance education.

The U.S. Department of Education defines distance education as follows:

*Note: Programs transitioning from less than 50% of its curricular requirements to 50% or more of its requirements being available via distance education is considered a Group C change and must complete the program proposal formwork before these changes will be processed.

Geographical Area Availability

Identify the geographical area(s) this program can be completed in:

| Moscow | X |
| Coeur d’Alene | X |
Boise* X
Idaho Falls* X
Other*:** X Location(s): Everywhere – certificate can be completed online

*Note: Programs offered in regions 3, 4, and/or 5 may require additional formwork from the State Board of Education. Contact the Office of the Provost for additional information.

**Note: If Other is selected identify the specific area(s) this program will be offered.

Rationale and Assessment Information
Rationale for approval of this request; include an explanation of how the department will manage the added workload of this new course and any relevant assessment information that applies to this course:

In the existing graduate certificate > 50% of its requirements can already be achieved via distance education.

Following program and curricula review by an employer’s summit and other stakeholder meetings, we are seeking to make the graduate certificate more accessible to students seeking a holistic understanding of fires role in the environment. These changes are made to (1) ensure that students can either complete the certificate either 100% online, (2) remove several undergraduate courses to put emphasis on graduate level education, (3) remove dormant course or courses that are not directly relevant to the degree, (4) add additional online graduate courses that have been recently developed, and (5) align the graduate certificate with the Fire Ecology and Management option in the online Masters of Natural Resources to better enable students to feed into that MS program.

These changes should not change faculty workload as existing faculty and courses are involved.
