

PURPOSE

The purpose of this activity is for you to review a report on signal timing that has been prepared by a practicing transportation engineer.

LEARNING OBJECTIVES

- Synthesize ideas from a professional engineering report

REQUIRED RESOURCE

- Example report

DELIVERABLE

- Prepare a document that includes your responses to the Critical Thinking Questions

INFORMATION

When you are doing something for the first time, it often helps to have examples of work that others have previously completed. The professional design report that you review will provide guidance and insights for you as you prepare your own final report.

TASK 1

Read the design report that has been assigned to you.

CRITICAL THINKING QUESTIONS

1. What were the primary conclusions of the report?

2. What were the strengths of the report?

3. What were the weaknesses of the report?

4. What aspects of the report will you attempt to model in your design report that you prepare in Activity #62?
