

# Michael Hopkins

“Our design approach synthesizes creative imagination and rational logic. Producing buildings that have a popular public appeal, whilst bearing no contradiction to the progressive culture of the early twenty-first century.”

## Hopkins and Partners

Michael Hopkins

Patty Hopkins

Bill Taylor

# Background

DOB May 7<sup>th</sup> 1935 in Poole, Dorset

Graduated in 1964 from the Architecture Association.

He is a trustee to the British Museum and served on the council of the Royal Institute for British Architects from 1991-1994.

Schulamberger Cambridge Research Center

Forum, Norwich

# Design Philosophy

“In pursuing environmentally appropriate buildings we are committed to developing designs that reconcile the potentially conflicting ethical and financial interests of our clients. We aim to integrate first principle concepts that enable each building component to contribute to energy conservation and operational efficiency as well as to its appearance. The integration, rather than the duplication of elements which control the environment is fundamental to this end.”
