Political science is the study of politics, the process of gaining, maintaining, and exercising governmental power in the United States, in other countries, and internationally. The political science major at UI provides students with a wide selection of courses in American and comparative politics, international relations, public law, public administration, and political theory. Students may choose either a Bachelor of Arts or Bachelor of Science degree program.

The department is committed to teaching excellence. Most of the introductory courses are taught by full-time faculty and all of the faculty are readily available in their offices for discussion and guidance. The department stresses the opportunity to take small classes and to interact with other students and faculty. The diversity of the faculty's intellectual pursuits and concern for students makes these courses interesting and ensures that, whatever the students' interests, from Middle Eastern politics to the American presidency, from the study of environmental politics to political violence and revolution, there is a scholar in the department who can teach the subject to them.

Students are encouraged to participate directly in the political process through internships in federal, state, and local government or on political campaigns. UI students have participated in internships with the Idaho state legislature, the Idaho Governor's office, and Idaho's U.S. senators and representatives in Washington, D.C. Other students have interned with local governments throughout the state and for federal agencies such as the State Department, and have worked on political campaigns for candidates for offices at all levels of government.

After graduation UI students find that their degree in political science opens the door to a wide variety of careers. Many students pursue careers in law. Others attend graduate school and prepare for careers in federal or state governments, as city managers or administrators, or as teachers. Some graduates choose to work with public interest groups, trade associations, and environmental groups; or eventually run for, and win, elective political office. Still other graduates find that their knowledge of politics and the skills they acquire to analyze complex institutions are excellent preparation for a career in journalism. Finally, business institutions are employing more and more political science graduates because of their ability to communicate with precision and vigor, their familiarity with large organizations and complex decision making processes, as well as their understanding of how foreign and domestic governmental institutions and U.S. multi-national corporations function in an interdependent world.

Political Science and Public Affairs Research Graduate Degree Programs

Candidates must fulfill the requirements of the College of Graduate Studies and of the Department of Political Science and Public Affairs Research. See the College of Graduate Studies section for the general requirements applicable to each degree.

Master of Arts. General College of Graduate Studies M.A. requirements for application must be followed. Applicants must also submit three letters of recommendation and a 300-500 word statement of purpose directly to the Department of Political Science.

Master of Public Administration. Although no specific undergraduate preparation is required for the M.P.A., all applicants must have a 3.0 GPA and submit GRE General Test scores that are no more than five years old. Three letters of recommendations are also required. Students with a lower GPA may, on occasion, be admitted provisionally. Students must have an appropriate background in American National Government and have taken Statistics 251 or its equivalent.

The MPA degree requires a minimum of 30 course credits. In addition a 3 credit public service internship is required for students without appropriate work experience in the public or nonprofit sectors. Students may use credits earned in approved courses taken at any of the cooperating universities (University of Idaho, Idaho State University, and Boise State University).

At least 18 credits must be taken from the Political Science Department with 15 credits required from core areas plus PolS 535. (See Political Science & Public Affairs Home Page for list of core classes). At least 12 credits are required in an area of emphasis. (Currently, the approved fields are: general public administration; community, state, and regional planning; criminal justice administration; environmental and natural resources administration; local government administration; public finance, budgeting, and administrative management; and public works engineering.)

Students may select a thesis or non-thesis option. The preparation and oral defense of the thesis count as six credits in the area of emphasis. Students selecting a non-thesis option must take comprehensive examinations.

Doctor of Philosophy. General College of Graduate Studies requirements for application must be followed. Applicants to the Ph.D. program must also submit Graduate Record Examination scores, three letters of recommendation, and a 300-500 word statement of purpose directly to the Department of Political Science.
COLLEGE REQUIREMENTS FOR THE B.A. AND B.S. DEGREES

Objectives. The College requirements for the B.A. and B.S. degrees are designed to ensure a broad, liberal education through the attainment of the following objectives: (1) proficiency in written and spoken English; (2) appreciation of great literature, music, and art; (3) knowledge of human development, the growth of social and economic institutions, and an understanding of the rights and responsibilities of the individual citizen; (4) perspective of American culture in the world at large; (5) sense of historical perspective; (6) acquaintance with moral, ethical, and aesthetic values; (7) familiarity with scientific thought and method; (8) ability to use and interpret basic mathematical concepts; (9) understanding of ecology; and (10) a continuing attitude of intellectual curiosity.

Requirements for the B.A. Degree:

Humanities. 6 credits (two courses) in addition to the minimum university-wide general education requirement in humanities/social sciences.

Social Sciences. 3 credits (one course) in addition to the minimum university-wide general education requirement in humanities/social sciences.

Foreign/Second Language. 0-16 credits (zero-four courses), i.e., competence in one foreign/second language equivalent to that gained by the completion of four semesters of college courses (through the intermediate level). This requirement may be satisfied by the completion of either of the following options: (1) 16 credits or four high-school units in one foreign/second language, or (2) 12 credits in one foreign/second language, and one three-credit course in literature translated from the same language. The 12 credits may be satisfied by three high-school units in one foreign/second language. A student may use coursework in American Sign Language offered at other institutions to fulfill this requirement. The coursework must be equivalent to that required at UI to fulfill this requirement.

Requirements for the B.S. Degree:

Humanities. 3 credits (one course) in addition to the minimum university-wide general education requirement in humanities/social sciences.

Social Sciences. 3 credits (one course) in addition to the minimum university-wide general education requirement in humanities/social sciences.

Natural Sciences, Mathematics, and Statistics. 6 credits (two courses) in addition to the minimum university-wide general education requirement in natural sciences/math.

For the B.S. degree, the student may substitute the successful completion of an academic minor or area of emphasis of at least 18 credits approved by the department in which the student is majoring.

Progress in Satisfying These Requirements. Students who wish to graduate by the end of four years of college work should take a program that results in substantial progress toward the fulfillment of the preceding requirements by the end of the sophomore year. In particular, students seeking the B.A. degree should take courses in fulfillment of the foreign-language requirement as early as possible. If they cannot do this during the first semester, they should immediately take a course that can be used in partial fulfillment of the science-mathematics requirement.
