Brad Dieter and Chantal Vella had their article, “A proposed mechanism for exercise attenuated methylglyoxal accumulation: Activation of the ARE-Nrf pathway and increased glutathione biosynthesis” published in Medical Hypotheses. Medical Hypotheses is a forum for ideas in medicine and related biomedical sciences. It publishes interesting and important theoretical papers that foster the diversity and debate upon which the scientific process thrives.

Dr. Stoll had four students, a part of the Idaho Falls Cohort group of Ed.D. students in the Professional Practice Doctorate, present their proposals for their dissertations, Wednesday, September 25. All are either teaching campus or online courses for BYU-Idaho.

Dr. Stoll is the president of the University of Idaho Phi Kappa Phi society, Chapter 73. Thursday evening, the society inducted 12 members into one of the oldest academic honor societies in America. University of Idaho is the only Phi Kappa Phi society in the state of Idaho.

The Center for ETHICS* and The World Anti-Doping Agency (WADA) are working on a collaborative education project, Competing with Honor: To Dope or Not to Dope. One of the projects goals is to educate high-level athletes on the value competing drug free. Upon successful completion of the initial project the course will become part of WADA’s educational curriculum. If you would like to have your athletes participate in the project please contact Dr. Stoll at sstoll@uidaho.edu.
