

Ethical Theory and Honor in Competition and Sport

RIGHT WRONG

The Center for ETHICS* at the University of Idaho offers study, intervention, outreach, consultation, and leadership in developing and advancing the theory, knowledge and understanding of character education including moral and ethical reasoning, moral development, ethical leadership, and ethical application. The Director of the Center for ETHICS* is Dr. Sharon Kay Stoll.

Dr. Stoll, as a member of the review board, did a review this week for *Quest*. *Quest's* primary purpose is to publish manuscripts that address issues and concerns relevant and meaningful to kinesiology and physical education in higher education. The journal does not publish original research reports, but welcomes manuscripts that are based on, complement or review empirical research related to our profession. Both theoretical and practice-based articles are considered. *Quest* serves a broad readership that includes academicians, teachers and administrators by providing a public forum for scholarly and creative thought about the profession.

Dr. Stoll returned from presenting at the 60th annual Western Society of Wellness and Kinesiology meeting in Reno. The conference, though appearing to be regional, has a decided international focus. Some quick numbers regarding 2015 conference below:

- 1) 60 WSKW conferences concluded
- 2) 36 total oral sessions.
- 3) 34 total poster presentations.
- 4) 70 total academic sessions
- 5) 44 Total Academic Institutions represented during sessions
- 6) 15 International institutions participated (including authors representing schools in New Zealand, Korea, Greece, England, and Japan; 34.09%).
- 7) 25 academic sessions had at least one author from a Carnegie research extensive university (35.71%)
- 8) 4.5 month submission period (longest in WSKW history)
- 9) 50 minutes of Peavy Paper presentation visibility (longest in WSKW history)
- 10) 365 days until next conference

Dr. Stoll also returned from a five day conference with the United States Anti-Doping Agency. Attendance included laboratory scientists from 35 global countries. Though the purpose of the yearly educational symposium is focused toward doping testing, Dr. Stoll gave a keynote on the importance of education, not training, in deterring cheating. The symposium was held in Washington, D.C.

Dr. Stoll's 34th doctoral student, David Ruiz, was interviewed for an article by Michael Popke which appears in the October 2015 issue of *Training & Conditioning*. The article discusses new modalities and interventions in the athletic training industry and the positive affects they are having on managing athletes' pain.
