

# What does it look like?

## **Human Dimension:**

learning about self, the journey towards self-authorship, learning about others, and the reciprocity of learning about self and others.

## **Caring:**

valuing or caring about something differently such as a phenomenon, an idea, their own self, others, the or process of learning.

## **Learning how to learn:**

learning how to construct new knowledge in a different domain of inquiry, and learning how to be a self-directed learner.

# What might it look like?

Individual: Choose one domain and then think of an activity that can address that domain.

Group: chose one domain and an activity that can address that domain.

Post on the mentimeter poll “which domain did you select and what is your activity?”

# What else does it look like?

## **Foundational Knowledge:**

teaching the factual knowledge and conceptual structure about a given subject.

## **Application:**

applying or using skills, learning how to manage complex problems, and develop the ability to engage in various kinds of thinking, e.g. critical thinking, creative thinking, and practical thinking.

## **Integration:**

learning how to connect and relate various things to each other, e.g. interdisciplinary learning, learning communities, and connecting academic work to other aspects of life.

# Step 1
