| 8:30 to 9:15 | **Online Peer Review**  
This session will highlight the importance of peer review in teaching and learning and provide tips about using BbLearn to facilitate peer review online.  
*In Whitewater - with Barb Kirchmeier* | **Assistive Technology: A Hands-On Overview**  
Discover how various assistive technologies can be used by individuals with disabilities as they continue their education and enter the workforce in this overview of tools and services that Idaho’s Assistive Technology program offers.  
*In Clearwater - with Dan Dyer and Eric Matson* |
| 9:30 to 10:15 | **Watch Me! Using Video Presentations in Your Courses**  
See how assigning student video projects can help develop valuable online presentation and production skills, such as voice-overs of images and creative self-made animations. We’ll share the proper instructional framework, tools, and grading criteria to ensure successful completion of student videos.  
*In Whitewater with Dr. Helen Joyner* | **Buzz Lightboard: Student Project Demo**  
Dr. Matt Swenson’s mechanical engineering student group will share and discuss their process for designing and building a lightboard teaching tool and show how it can be used for educational visualization and instruction.  
*In Clearwater with Dr. Matt Swenson* |
| 10:30 to 11:15 | **Technology Cage Match: Klaxoon vs. Acadly**  
This session describes a semester-long experiment with integrating multiple classroom technologies and how students helped in determining an effective collaborative learning environment.  
*In Whitewater - with Dr. Jaap Vos* | **See it, Fix it: Document Accessibility & Ally**  
In this session, we will share how Ally can help you find major accessibility problems in your course materials and walk you through the process of fixing the most common issues.  
*In Clearwater with Carie Saunders & Cassidy Hall* |
| 11:30 to 12:15 | **Engagement for 300: Technology for Large Classes**  
We will share several innovative tools and apps to help engage students in a high-enrollment Environmental Science class. An Instructor/student panel will discuss challenges, perceptions, and strategies for effectively using innovative technologies with a large group of students.  
*In Whitewater - with Dr. Jocelyn Aycrigg* | **Transformational Learning: Naturalist Notebooks**  
What happens when we ask students to slow down and visualize nature? In this session, we will share a creative project that allows students to experience their relationship to the environment in an entirely new way as they observe, sketch, and reconnect with nature, resulting in some surprising technology implications and transformative learning.  
*In Clearwater with Karen Thompson* |
