INTRODUCTION

REVISITING COURSE MATERIALS

Traditionally, course materials have primarily been delivered in textual format.

**That said:**

1. Research has found that textual materials are not as efficient for presenting a lot of complex or straightforward concepts (Houston, 2018)

**More to the Point:**

1. Providing alternatives, such as videos, to textual content can make course content more interesting as well as comprehensible for all learners
COMMON COMMUNICATION BARRIERS
BETWEEN TEACHERS AND STUDENTS

Communication problems which create a barrier to engagement:

1. Rationale behind approaches and tasks is unclear
2. Confusion about task requirements and how to complete activities and assignments
VIDEOS WITH CLEAR EXPECTATIONS

EFFECTIVE INSTRUCTIONAL VIDEOS

Videos with clear expectations provide instructors:

- A convenient way to reach learners when and where they need it
- The flexibility to change or update content when it needs it
- The ability to assess skills, knowledge, and understanding

Ways to provide clear expectations:

- Video Guides
- Concept Explainers
EXAMPLES
TYPES OF INSTRUCTIONAL VIDEOS

Ways to use instructional videos in your classroom

1. **Screencasts.** A digital recording of a computer screen.

2. **Microlectures.** Short videos to guide students through comprehending complex concepts.

3. **Interactive Videos.** Interact with video content through a variety of gamified tools.

**Recording Tools**

- Smartphone
- Zoom
- Flipgrid
VIDEO DESIGN CONSIDERATIONS

Pay attention to the following design consideration before filming:

- Define your audience
- Define your objective
- Define your key takeaway
- Keep it simple, basic and clear
- Be authentic
