

Summer 2018 Online Course

REM 341 – Systematic Botany (3 credits)

Can you identify any of these plants?

If not, sign up for the online Summer 2018 REM 341 – Systematic Botany course. By the time you are done with this course, you will be able to:

- Demonstrate your knowledge of the distinguishing characteristics of plant families, particularly those native to the Pacific Northwest and northern Great Basin of North America
- Apply the terminology, tools, and techniques for identifying many different trees, shrubs, and wildflowers using dichotomous keys, especially during online lab and field assignments
- Test your knowledge by providing a plant collection as one of your final projects

Contact: Justin J. Trujillo at jtrujillo@uidaho.edu if you have further questions
