

**College of Agricultural and Life Sciences  
Proposed Catalog Changes  
Effective Summer 2020**

1. Make the following changes to the **M.S. in Water Resources – All Option Areas** and the **Ph.D. in Water Resources – All Option Areas**:

### Common Courses

Students in both M.S. and Ph.D. degree programs are required to fulfill a set of common courses, applicable to all three Water Resources Option Areas. The common courses are:

WR 501	Seminar	1-16
WR 506	Interdisciplinary Methods in Water Resources	<del>3</del> <u>2</u>
<del>WR 507</del>	<del>Integrated Water Resources Projects</del>	<del>3</del>
Select one 500-Level Elective Course <sup>1</sup>		3
<b>Total Hours</b>		<del>10-25</del> <u>6-21</u>

<sup>1</sup> (Or 900- level in LAW) In an option area outside the main option area (3 credits for Ph.D. only).

**Rationale:** These are straight-forward changes to clean up the curriculum. No additional workload will be incurred as a result of this change.
