

CS 488/588 – Applied Data Science with Python

Semester: Fall 2024 (August 19 – December 13)

Credit Hours: 3

Instructor: Alex Vakanski, vakanski@uidaho.edu

Office Location: TAB 311, Idaho Falls Center

Course Delivery Methods:

- Virtual meetings (live meetings, students participate through Zoom)
- Classroom (live meetings, video link from Idaho Falls)
- Online (recorded Zoom videos of lectures available to students to watch after the classes)

Course Description

The course introduces students to Python tools and libraries that are commonly used by organizations for managing the various phases in the life cycle of data science projects. The content is divided into four main themes. The first theme reviews the fundamentals of Python programming. The second theme focuses on data engineering and explores Python tools for data collection, exploration, and visualization. The next theme covers model engineering and includes topics related to model design, selection, and evaluation for image processing, natural language processing, and time series analysis. The last theme introduces Data Science Operations (DSOps) and encompasses techniques for model serving, performance monitoring, diagnosis, and reproducibility of data science projects deployed in production. Throughout the course, students will gain hands-on experience with various Python libraries for data science workflow management. Additional work is required for graduate credit.

Learning Outcomes

Upon the completion of the course, the students should demonstrate the ability to:

1. Attain proficiency with commonly used Python frameworks for managing the life cycle of data science projects.
2. Develop pipelines for integrating data from multiple sources, designing predictive models, and deploying the models.
3. Apply Python tools for data collection, analysis, and visualization, such as NumPy, Pandas, Matplotlib, and Seaborn, to real-world datasets.
4. Implement machine learning algorithms for image processing, natural language processing, and time series analysis using Python-based frameworks, such as Scikit-Learn, Keras, TensorFlow, and PyTorch.
5. Understand the principles of model selection and evaluation, including hyperparameter tuning, cross-validation, and regularization.
6. Understand the primary characteristics of current Python libraries for deployment, continuous integration, and monitoring of data science projects.
7. Deploy data science projects as web applications using Flask, FastAPI, and Django, and to cloud servers using Microsoft's Azure platform.

Prerequisites

The course requires to have basic programming skills in Python. While having knowledge of data science methods would be advantageous, it is not mandatory.

Textbooks

There are no required textbooks for this course.

Grading

Student assessment will be based on 6 homework assignments (worth 60 pts), 3 quizzes (worth 30 marks), and class participation and engagement (worth 10 marks).

<i>Assessment Component</i>	<i>Marks</i>
Assignments (x6)	60
Quizzes (x3)	30
Class participation	10
<i>Total</i>	<i>100</i>

Tentative Schedule

<u>Date</u>	<u>Topics, Tests, Assignments</u>
Week 1: Aug. 19	<p>Introduction</p> <p>Lecture 1: A Short History and Current State of Artificial Intelligence</p> <p>Python Review</p> <p>Lecture 2: Python Data Types</p> <ul style="list-style-type: none"> – Numbers, Strings, Lists, Dictionaries, Tuples, Sets, Other Types <p>Tutorial 1: Jupyter Notebooks</p>
Week 2: Aug. 26	<p>Python Review</p> <p>Lecture 3: Statements, Files</p> <ul style="list-style-type: none"> – Conditional statements, loop statements – File handling, opening, writing, appending, iterating through a file, storing objects in files <p>Lecture 4: Functions, Iterators</p> <ul style="list-style-type: none"> – Function definition, function call, argument passing, namespace and scope <p>Tutorial 2: Terminal and Command Line</p>
Week 3: Sep. 2	<p>Python Review</p> <p>Lecture 5: Object-Oriented Programming, Modules, Packages</p> <ul style="list-style-type: none"> – Class definition, attributes, methods, inheritance, polymorphism, special methods – Creating and using modules, module namespaces, organizing modules into packages

	<p>Data Engineering Pipelines</p> <p>Lecture 6: NumPy for Array Operations</p> <ul style="list-style-type: none"> – Array creation, indexing, broadcasting and vectorization, reshaping arrays, linear algebra with NumPy <p>Tutorial 3: Python IDEs, Visual Studio Code</p> <p>Due: Homework 1</p>
Week 4: Sep. 9	<p>Data Engineering Pipelines</p> <p>Lecture 7: Data Manipulation with Pandas</p> <ul style="list-style-type: none"> – Importing data, indexing and slicing, merging, sorting, exporting data, dealing with missing values <p>Lecture 8: Data Visualization with Matplotlib</p> <ul style="list-style-type: none"> – State-based approach, customizing plot appearance, saving figures, subplots, plotting functions, object-oriented approach <p>Tutorial 4: Virtual Environments</p> <p>Due: Homework 2</p>
Week 5: Sep. 16	<p>Data Engineering Pipelines</p> <p>Lecture 9: Data Visualization with Seaborn</p> <ul style="list-style-type: none"> – Creating statistical plots, visualizing relationships between variables, customizing plot styles <p>Lecture 10: Statistical Data Analysis</p> <ul style="list-style-type: none"> – Descriptive statistics, measures of central tendency, measures of variability, inferential statistics, regression analysis <p>Tutorial 5: Web Scraping</p> <p>Quiz 1</p>
Week 6: Sep. 23	<p>Data Engineering Pipelines</p> <p>Lecture 11: Databases and SQL</p> <ul style="list-style-type: none"> – Intro to SQLite, creating databases, querying, sorting, filtering, joining tables, conditional expressions, grouping data, subqueries <p>Lecture 12: Data Exploration and Preprocessing</p> <ul style="list-style-type: none"> – Exploratory data analysis, preprocessing numerical data, preprocessing categorical data <p>Tutorial 6: Google Colab</p>
Week 7: Sep. 30	<p>Model Engineering Pipelines</p> <p>Lecture 13: Scikit-Learn Library for Data Science</p> <ul style="list-style-type: none"> – Supervised and unsupervised learning algorithms, regression, classification, clustering – k-Nearest Neighbors, Support Vector Machines, Logistic Regression, Decision Trees, Random Forest, Naïve Bayes, Stochastic Gradient Descent <p>Tutorial 7: Image Processing with Python</p> <p>Due: Homework 3</p>

Week 8: Oct. 7	Quiz 2
Week 9: Oct. 14	<p>Model Engineering Pipelines</p> <p>Lecture 14: Ensemble Models – Voting, bagging, boosting, stacking ensembles</p> <p>Lecture 15: Artificial Neural Networks with Keras-TensorFlow – Activation functions, losses, backpropagation, fully-connected layers, classification and regression</p> <p>Tutorial 8: TensorFlow</p>
Week 10: Oct. 21	<p>Model Engineering Pipelines</p> <p>Lecture 16: Convolutional Neural Networks with Keras-TensorFlow – Convolutional layers, models for image classification, transfer learning, fine-tuning pretrained models</p> <p>Lecture 17: Model selection, Hyperparameter Tuning, Callbacks – Grid search, cross-validation, model evaluation, callbacks for model monitoring</p> <p>Tutorial 9: PyTorch</p>
Week 11: Oct. 28	<p>Model Engineering Pipelines</p> <p>Lecture 18: Artificial Neural Networks with PyTorch – Data loaders, model definition, training, and evaluation, custom datasets, model saving and loading</p> <p>Lecture by Guest Speaker Dr. Konstantinos Kolia – Applications of Machine Learning in Cybersecurity</p> <p>Due: Homework 4</p>
Week 12: Nov. 4	<p>Model Engineering Pipelines</p> <p>Lecture 19: Natural Language Processing – Preprocessing text data, tokenization, representation of word groups, sequence model approach, word embeddings</p> <p>Lecture 20: Transformer Networks – Self-attention mechanism, multi-head attention, positional encoding, encoder and decoder blocks, fine-tuning pretrained models</p> <p>Tutorial 10: Bash Scripting</p>
Week 13: Nov. 11	<p>Model Engineering Pipelines</p> <p>Lecture by Guest Speaker Dr. Konstantinos Kolia – Hands-on exercises on classification of side-channel attack</p> <p>Lecture 21: NLP with Hugging Face – Pipelines for NLP tasks, tokenizers, datasets, models</p> <p>Tutorial 11: Git and Version Control</p> <p>Due: Homework 5</p>
Week 14: Nov. 25	<p>Deployment Pipelines</p> <p>Lecture 22: Large Language Models</p>

	<ul style="list-style-type: none"> – Fine-tuning a pretrained model, low-rank adaptation (LoRA), prefix tuning, prompt tuning <p>Lecture 23: Introduction to Data Science Operations (DSOps)</p> <ul style="list-style-type: none"> – DS project life cycle, levels of automation, model deployment, model serving in production <p>Tutorial 12: TensorFlow Serving</p>
Week 15: Dec. 2	<p>Deployment Pipelines</p> <p>Lecture 24: Deploying Projects as Web Applications</p> <ul style="list-style-type: none"> – Intro to Flask, FastAPI, Django, creating RESTful API to serve data and model predictions, models for tabular data and image classification <p>Lecture 25: Deploying Projects to the Cloud</p> <ul style="list-style-type: none"> – Intro to Azure Machine Learning, no-code ML, code-based ML, training deep learning models with Azure ML <p><u>Due: Homework 6</u></p>
Week 16: Dec. 9	Quiz 3

Academic Integrity

Students are expected to adhere to the highest academic standards of honesty and integrity. At UI, we assume students will do their own work. Plagiarism—passing off someone else's work as your own, without citing the source—should not be tolerated. This includes direct copying, rephrasing, and summarizing, as well as taking someone else's idea and putting it in different words. The best avenue for avoiding plagiarism issues is to fully cite all sources used for preparing assignments, texts, and exams.

Learning Civility

In any environment in which people gather to learn, it is essential that all members feel as free and safe as possible in their participation. To this end, it is expected that everyone in this course will be treated with mutual respect and civility, with an understanding that all of us (students, instructors, professors, guests, and teaching assistants) will be respectful and civil to one another in discussion, in action, in teaching, and in learning.

Should you feel our classroom interactions do not reflect an environment of civility and respect, you are encouraged to meet with your instructor during office hours to discuss your concerns. Additional resources for expression of concern or requesting support include the Dean of Students office and staff (208-885--6757), the Uofl Counseling & Testing Center's confidential services (208-885-6716), the Uofl Office of Equity and Diversity (208-885-2468), or the Office of Civil Rights and Investigations (208-885-4285).

Center for Disability Access & Resources (CDAR)

University of Idaho is committed to ensuring an accessible learning environment where course or instructional content are usable by all students and faculty. If you believe that

you require disability-related academic adjustments for this class (including pregnancy-related disabilities), please contact the Center for Disability Access and Resources (CDAR) to discuss eligibility. A current accommodation letter from CDAR is required before any modifications, above and beyond what is otherwise available for all other students in this class will be provided. Please be advised that disability-related academic adjustments are not retroactive. CDAR is located at the Bruce Pitman Building, Suite 127. Phone is 208-885-6307 and e-mail is cdar@uidaho.edu. For a complete listing of services and current business hours visit <https://www.uidaho.edu/current-students/cdar>.

Inclusivity Statement

As a professor/course instructor at the University of Idaho, I acknowledge the importance of diversity and inclusion and how these attributes contribute to the promotion of a positive educational experience. It is my intent to facilitate a healthy, productive, and safe learning environment where diverse thoughts, perspectives, and experiences are welcomed, and individuals' identities (including, but not limited to: race, sex, class, sexual orientation, gender identity, ability, religious beliefs, etc.) are valued and honored. I recognize that as an educator, it is my responsibility to take the initiative to continually learn about diverse perspectives and identities; therefore, if at any point during the course, you feel uncomfortable or concerned, I am more than willing to discuss suggestions, feedback, and anything else that might improve the general effectiveness of this course.

Healthy Vandals Policies

Please visit the [University of Idaho COVID-19 webpage](#) often for the most up-to-date information about the UofI's response to Covid-19.

Vandal Food Pantry

The [Vandal Food Pantry](#) is a free resource stocked weekly with food, grocery bags, and various hygiene items. Its eight locations across campus are accessible during building hours and open to all. Please take what you need.

Green Dot Safety Program

What's Your Green Dot? It's up to all of us to make a safer campus. Vandal Green Dot is a program that helps students learn about the power of the bystander, how to recognize potentially risky situations, and realistic ways to intervene. Together we can bring down the number of people being hurt by interpersonal violence on our campus. No one has to do everything, but everyone has to do something! Learn more and get involved by visiting [UI's Green Dot Safety Program](#) or emailing greendot@uidaho.edu.

Help and Resources

Student Resources

The University of Idaho provides student support to ensure a successful learning experience.

- [Student Resources Webpage](#)

- [SI-PASS \(Peer Assisted Study Sessions\)](#) SI-PASS provides regularly scheduled, peer-led study sessions for difficult courses.

Library Help

The Uofl Library website has many databases that will help you find relevant and reliable books, articles, images, and more. Don't hesitate to contact a librarian for research assistance.

- [Uofl Library Website](#)
- [Help - Reference Services](#)
- [Help for Distance Ed Students](#)

Technology Help

The Uofl Student Technology Center provides many technology-related services to students.

- PHONE: 208-885-HELP (208-885-4357)
- Technology Help Email: support@uidaho.edu
- [Technology Help Website](#)

Writing Support

The Uofl Writing Center provides one-on-one assistance to student writers and other members of the campus community.

- PHONE: 208-885-6644
- Writing Center Email: writingcenter@uidaho.edu
- [Writing Center Website](#)

Uofl Moscow Land Acknowledgement

Uofl Moscow is located on the homelands of the Nimiipuu (Nez Perce), Palus (Palouse) and Schitsu'umsh (Coeur d'Alene) tribes. We extend gratitude to the indigenous people that call this place home, since time immemorial. Uofl recognizes that it is our academic responsibility to build relationships with the indigenous people to ensure the integrity of tribal voices.
